Seend Parish NDP

Local Green Space

Local green space designation is a way for the Neighbourhood Plan to provide special protection for green areas of particular importance to the community. For a space to be eligible, it has to be particularly locally important with regard to beauty, wildlife, tranquillity, recreation or historic significance. It must also be small, not an 'extensive' area and in, or near to, the community which use it.

Please give us your suggestions for Local Green Space designations in the table below, as well as your views as to why you think they're important.
