

Introduction to the Seend Parish Neighbourhood Plan

- Seend Parish Council was formally designated to produce a Neighbourhood Plan on 29th July 2016.
- Early consultation and work by the Steering Group suggested some of the key issues for our local community. Work then focused on evidence collection around these issues.
- Since early 2018, the group have been working with consultants Place Studio to further shape the content and evidence base of the Plan.
- Work has also recently started on site assessments to consider whether the Plan should allocate land for future development.
- The basic content of the Neighbourhood Plan is emerging and we need your views and ideas to ensure it reflects what you think and want, within the parameters of the Plan's powers.
- After the overall Vision and Objectives for the Parish, the main headings in the Plan – each covered on the boards that follow – are likely to be:
 - Community Facilities
 - Highways
 - Parish Landscape, Character and Design
 - Valued Views
 - Local Heritage Assets
 - Local Green Spaces
 - Footpaths and Green Infrastructure
 - Future Development in Seend Parish

Please have a look around, ask any questions, and be sure to let us have your views on what has been done so far – it is all in draft – your input and views are important. There is a large map in the middle to which you can add comments and there are sheets for you to add comments to near each board.

Thank you!
